

METHOD FOR DRIVING PLASMA DISPLAY PANEL
AND PLASMA DISPLAY DEVICE

5

ABSTRACT OF THE DISCLOSURE

10 A method for driving a plasma display panel, wherein
a display field, corresponding to a display of a screen,
is composed of a plurality of subfields, a gradation
display is realized by combining subfields to be lit
among the plurality of subfields, cells to be lit in the
display field are separated from unlit cells and all of
15 the cells to be lit are lit in a predetermined subfield
arranged near the head in the display field. The
gradation display level is set with the light emission in
the predetermined subfield being taken into
consideration.
